I am very proud to announce that I have been honored by the Magi Society by being formally accepted into their fast track **Magi Astrologer Certification Program**.. Within about 6 months, I'll be one of a select number of Certified Magi Astrologers worldwide!

I am also thrilled to have finally received the **Magi Society Professional Software**, including Geocentric longitudes and declinations (the visible astrology of the ancients) and **Heliocentric longitudes and latitudes** (as viewed from the Sun). These 4 dimensions of the planets and 4 major asteroids (traditional astrology uses only one dimension) can be viewed and compared to **deeply understand personal relationship compatibility, business partnership profitability and recognition potential, current and future trends in business and romance, to select crucial dates such as wedding dates, mortgage signing dates and dates of incorporation, and even to forecast stock performance.** All Magi Astrology interpretation is based strictly upon statistical computer analysis of hundreds of thousands of birth charts of famous people and events-- changing some traditional meanings, but adding much greater accuracy of prediction!

Mercury goes retrograde 6/4 thru 6/28/01. I'm noticing more and more that the "Mercury retrograde effect"- computer glitches, miscommunications, typos, numerical errors, travel problems- seems to start before the planet actually begins its retrograde cycle. One theory is that the problems begin when the planet starts to move through the degrees it will later retrograde back over. This time around, it began May 20. The next pre-retrograde cycle will begin 9/11/01, with Mercury retrograde beginning 10/01/01. Keep an eye on this phenomenon, and let me know what you discover!

Full Moon is 6/5 at 6:39 pm PDT. The Scorpionic theme continues this month, even during this Sagittarius Full Moon, with Pluto conjunct the Moon, opposite Sun widely conjunct Jupiter, and with Mars and Chiron also nearby in Sag. Deep and transformative feelings are still a main theme, best to be explored inwardly, rather than exploded outwardly. A saving grace is the Venus-Chiron trine, even though it's separating away from full influence.

Upcoming noteworthy **Magi Days: 6/14/01**-- the best time to end a relationship that is lingering on, a perfect day to say goodbye.

Amorous feelings should run high from 6/17 through 6/26 as seductive Venus dances with Pluto and then Mars in Sagittarius from a quincunx position in Taurus.

Our next **New Moon is Summer Solstice 6/21 at 4:58 am PDT.** It's an interesting juxtaposition of the longest day in the Solar cycle, and darkest night, followed by the Moon's rebirth, in the Lunar one. Sun and Moon are together in 0° Cancer, still widely conjunct Jupiter which is now together with Mercury, and opposite the continuing Mars-Chiron conjunction. We should be free of Pluto's spell, with our thoughts lighter and brighter, although tempers could still flare due to the Martian influence.

For Star Gardeners- **A Lunar Gardening Guide:**

1. Avoid major activities when the Moon is Void of Course.
2. Plant seeds just before the New Moon when the Moon is in the fertile signs of Taurus, Cancer, Scorpio, or Pisces. Second best are the signs of Virgo, Capricorn or Libra- Libra is best for ornamentals.
3. Transplant during the Full Moon in the fertile signs.
4. Weed and manage pests during the 4th quarter Moon in the barren signs of Aries, Gemini, Leo, Sagittarius, and Aquarius.
5. Prune for growth during the 1st quarter Moon. Prune to retard growth during the 3rd and 4th quarter Moons. Avoid pruning at the Full Moon-- plants are most easily damaged due to highest sap flow.
6. Remember the basic lunar rule: activities during New and Full (waxing) Moons promote growth, during the waning Moon they decrease or retard growth.

Remember, **Moon Void** is not a good time to attempt anything important -- **Moon Void times for the next month lasting an hour or more during the business day (more or less) are** 6/4 4:29 am PDT- 1:58 pm PDT, a **Moon Void Marathon** 6/7 2:57 am PDT- 6/9 at 8:20 am PDT, 6/14 3:26 am PDT- 10:03 am PDT, 6/22 7:11 am - 6/23 5:55 am PDT, 6/27 3:12 am PDT- 9:11 am PDT, and 6/29 8:07 am PDT- 1:28 pm PDT. Don't forget that the Moon is also void other days and times and/or for shorter periods...

Again, **the simplest resource for Moon Void and Moon in Signs information** day-by-day is the Llewellyn Astrological Pocket Planner: Daily Aspectarian from Llewellyn Publications at (800) THE-MOON, or www.llewellyn.com/bookstore/ under Calendars & Annuals.
