Ruling Chart Report Key

Quick-Start Guide

Horizontal bars of color = cycles for the day

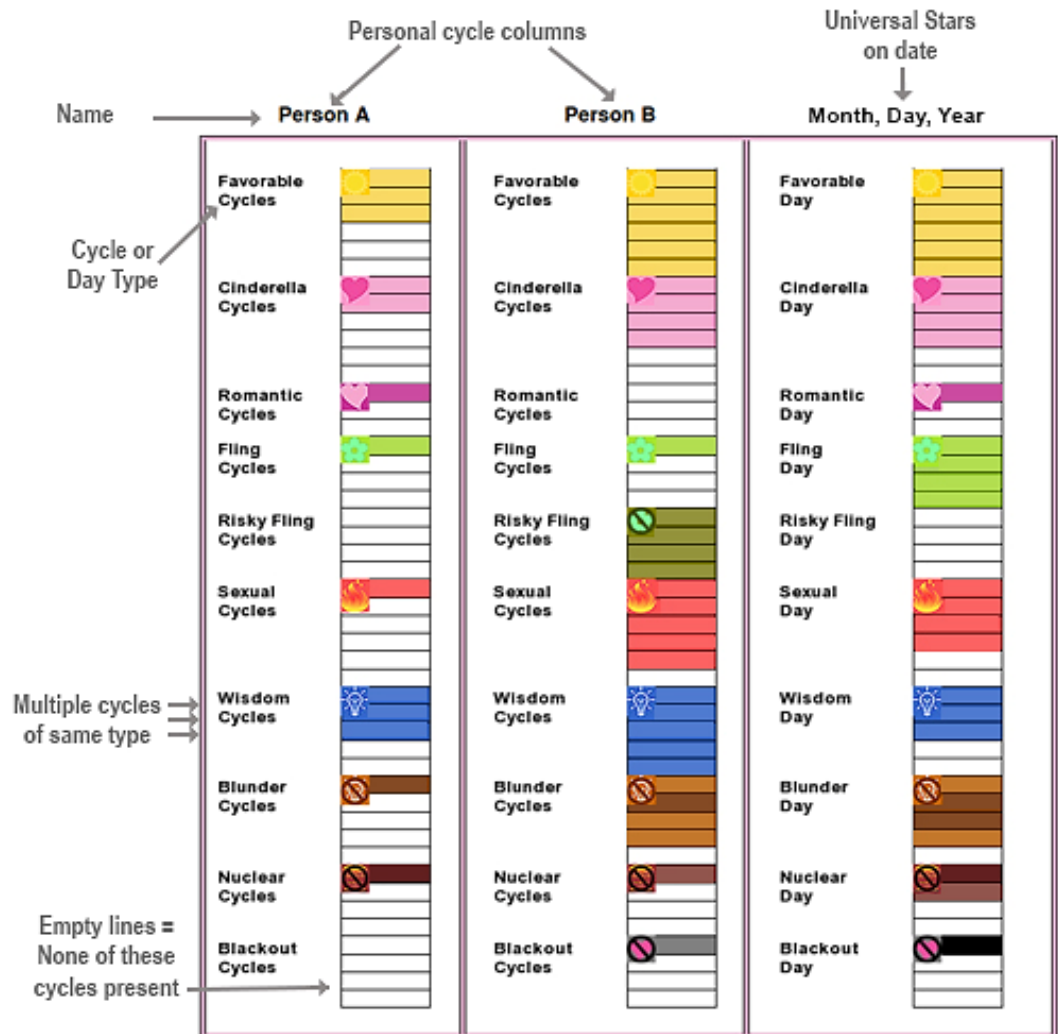

Each horizontal bar = one cycle

Trouble seeing something? Adjust your display settings or zoom in your view.

In Brief:

The more positive cycles for each person and within the day itself the better!

When your personal cycles and/or the Universal Stars show high numbers of unfavorable cycles, use caution!

Use these quick links If your pdf viewer supports live links:

Understanding your Ruling Chart Report

The Ruling Chart of your relationship exerts a powerful influence on the outcome. Understand the personal cycles each of you were in for the date you ordered: your 1st meeting date, 1st lovemaking date, engagement date or wedding date, as well as the Universal Stars of that date, based on the scientifically-proven principles of six-dimensional* Magi Astrology.

The date of your 1st face-to-face meeting creates the astrological birth chart of your relationship, called the Ruling Relationship Chart. When you become lovers, the chart of that date – the Love Chart – becomes the Ruling Chart. From the day you become engaged, you are ruled by the Engagement Chart. Despite the current Ruling Chart, preceding charts still have some influence, until the day you marry, after which your Wedding Chart supersedes all previous Ruling Charts.

Magical Wedding Dates

The ruling chart of your relationship is a crucial key to the relationship's potential- it can dramatically influence happiness or heartbreak, success or failure and help determine if the couple will move on to the next stage of their relationship.

Both people's personal cycles and the quality of the day itself are important. Both personal cycles and the Universal stars of the day itself are broken into categories. You may have one or more than one of each cycle, or none. Some types of cycles and days are very positive, some are not. It is normal to have some of both. There are no perfect days, nor are there perfect people or perfect relationships. What we are hoping for is that your first meeting date is GOOD ENOUGH to allow this relationship to blossom.

The ruling chart by itself is a key to the basic strengths and weaknesses of the relationship and its likely outcome. It also has much to do with how each partner perceives the relationship.

Comparing the ruling chart to each individual birth chart reveals what each partner stands to gain or lose from the relationship, such as:

- Individual potential for happiness & satisfaction
- Individual potential for career success
- Personal issues the relationship is likely to trigger
- Potential for heartbreak

The more positive cycles for each person and within the day itself the better! When your personal cycles and/or the Universal Stars aren't hopeful: go slow, keep your eyes open, and watch for red flags.

If you are looking for your soulmate, the two most important categories are Cinderella and Blackout. Extensive research has proven that you can only meet your soulmate when you are having one or more Cinderella Cycles. The left and center columns will show you how many Cinderella Cycles each of you had on your meeting date. It is also critical to know your Blackout Cycles – it is unlikely that you will meet your soulmate during a Blackout Cycle EVEN IF you also have Cinderella Cycles, and highly unlikely if you have multiple Blackout Cycles.

Important: Everyone's cycles fluctuate dramatically. You may find that your ruling chart event happened at a particularly good time in your life, or at a particularly bad one.

If this report isn't what you hoped for, at least you have the knowledge to turn this to your advantage. You can be extra careful in this relationship, not ignore red flags when you see them, and walk away when you need to instead of spending months or years trying to make it work. Remember – good stars always follow bad stars, and over time, EVERYONE has cycles which help them to find their soulmate!

Cycles are graphed for the time listed on your order, or noon if unknown. Average and high numbers for each category of Cycles and Days are listed for comparison purposes. Be sure to compare your numbers to these average and high numbers to know where this date fits in to the broad spectrum of Ruling Relationship Chart dates. Moon is not used for any person whose birth time or birth place is unknown.

The Universal Day information in this report gives you the most basic and fundamental Universal Stars which affect relationships. This information may or may not correlate with the Magi Society's Best and Worst Days online. Always keep in mind that the Magi Society's days listed for each month are "best and worst," not "good and bad," and are chosen for many types of situations, not only love. Each month's selections are relative to that month's quality of days available. Ruling Relationship Charts, unless carefully chosen using Magi principles, are seldom perfect. Your Ruling Chart Report helps you to understand more about this relationship's odds of success vs. failure.

This report is designed to help you understand the key components of your Ruling Relationship Chart for a 1st meeting or other Ruling Chart date which has already happened. It's FAR BETTER to be proactive and to choose the date for your 1st meeting, 1st lovemaking or other Ruling Chart date during Cinderella Cycles and avoiding Blackout Cycles. Do this with a [Star-Timer Love Calendar](#).

Cycle and Day Categories

Favorable Cycles and Days

Favorable Cycles: These can be excellent times to start anything new, including a relationship. Days with high numbers of Favorable Cycles are the days when you are most blessed and protected. Days with many Favorable Cycles are the times when you are most likely to have good things happen, including having someone good for you enter your life.

Favorable Days: These are Universal days which are more typically blessed than normal, and days with higher than average numbers of favorable aspects are typically better than average days to meet someone new. These Universal Days tend to support goodness, protection and true love.

Personal Cycles: Average number of Favorable Cycles: 3. High number of Favorable Cycles: 4+.
Universal Stars: Average number of Favorable Aspects: 3. High number of Favorable Aspects: 4+

Cinderella Cycles and Days

Cinderella Cycles: These are the times when you can meet your soulmate. The more concurrent Cinderella cycles you have, the greater the chance you have met a potential soulmate. During Cinderella Cycles, people see you in your best possible light. Your charisma and ability to make a good impression are at a peak. However, if you ALSO have Blackout Cycles, this is a sign that this person is probably not your soulmate. [More](#)

Cinderella Days: Days with higher than average numbers of Universal Cinderella aspects. These days favor true love and are excellent to have in a first meeting chart.

If you meet someone during lots of Cinderella cycles and they still don't turn out to be THE ONE, don't panic! Everyone has many Cinderella Cycles in their life. Get ready for your next Cinderella Cycles with a [Star-Timer Love Calendar](#).

Personal Cycles: Average number of Cinderella Cycles: 2. High number of Cinderella Cycles: 3+.
Universal Stars: Average number of Cinderella Aspects: 2. High number of Cinderella Aspects: 3+.

Romantic Cycles and Days

Romantic Cycles: These indicate times when you are a starry-eyed romantic looking for love. You just may find it – but only if you ALSO have concurrent Cinderella Cycles. Romantic cycles create the yearning for love, but Cinderella Cycles are the times when you can really meet your soulmate.

Enjoy Romantic Cycles but be aware that they can create such a yearning for love that you are willing to overlook too many negatives in a potential relationship. Be especially careful if you have no Cinderella Cycles or have higher than average numbers of Nuclear, Blunder or Blackout Cycles! Otherwise you might wake up one day when the Romantic Cycle is over and say to yourself, "*What was I thinking???*"

Romantic Days: Multiple Romantic Aspects indicate days with stronger than average Universal romantic energy. This can be a real plus for a relationship based on true love, but can blind you for a while at least to a flawed relationship if not. The Ruling Relationship Chart is one guide to the relationship's potential. Find out more with a [Complete Relationship Report](#).

Personal Cycles: Average number of Romantic Cycles: 0 or 1. High number of Romantic Cycles: 2+.
Universal Stars: Average number of Romantic Aspects: 1. High number of Romantic Aspects: 2+.

Fling Cycles and Days

Fling Cycles: These are times when you may be more interested in a casual relationship than in meeting your true love, unless you ALSO have Cinderella Cycles. In this case, you will probably become more interested in commitment after your Fling Cycle(s) have passed.

Fling Days: Days with multiple Fling Aspects are days which incline everyone toward no-strings fun and away from commitment. Relationships begun on days with higher than average numbers of Fling Aspects have less chance of becoming long-term and serious.

Fling Cycles and Days don't carry the inherent risk of Risky Fling Cycles and Days, but that is still no guarantee the fling is "safe."

Personal Cycles: Average number of Fling Cycles: 1 or 2. High number of Fling Cycles: 3+.
Universal Stars: Average number of Fling Aspects: 2-3. High number of Fling Aspects: 4.

Risky Fling Cycles and Days

Risky Fling Cycles: These are times when you could be taking a very real risk if you begin a fling. If you have a higher than average number of Risky Fling Cycles, the likelihood of the fling creating negative repercussions in your life of some kind are significantly higher than normal.

If your Risky Fling Cycle(s) are Light Olive (transits outside the power orb), your risk is higher than normal. If your Risky Fling Cycle(s) are Dark Olive your risk is much higher than normal.

Risky Fling Days: Days with a higher than normal number of Risky Fling Aspects are days when everyone is at greater risk when starting a fling. The color of the cycle indicates lower or higher risk just like in Risky Fling Cycles.

There are lots of ways a fling can disrupt your life, so be careful if a high number of these cycles show up in Personal Cycles or in Universal Days, especially if you have higher than average numbers of Nuclear, Blunder or Blackout Cycles or if higher than average numbers of these Cycles are found in the Universal Stars. [More](#)

Personal Cycles: Average number of Risky Fling Cycles: 1 or 2. High number of these Cycles: 3+.
Universal Stars: Average number of Risky Fling Aspects: 2. High number of these Aspects: 3+.

Sexual Cycles and Days

Sexual Cycles: These are times when both your libido and performance are at a peak. Relationships begun during a high number of Sexual Cycles are off to a very sexy start! This is great for a fling, and also great for a relationship based on true love. Just like with Romantic Cycles though, be especially careful if you have no Cinderella Cycles or have multiple Risky Fling, Nuclear, Blunder or Blackout Cycles. Otherwise the super-charged sex could blind you important truths about the relationship, such as that this person isn't actually your soulmate. Find out more with a [Complete Relationship Report](#).

Sexual Days: When a day has a higher than average number of Sexual Aspects, everyone sizzles more than usual. Again, this is great for a fling, and also for a relationship based on true love. Sexual Days are more misleading and problematic if multiple Risky Fling, Nuclear, Blunder or Blackout Cycles are found in the Universal Stars.

Personal Cycles: Average number of Sexual Cycles: 4. High number of Sexual Cycles: 5+.

Universal Stars: Average number of Sexual Aspects: 4. High number of Sexual Aspects: 5+.

Wisdom Cycles and Days

Wisdom Cycles: These are the times when your judgment is most clear and far-seeing. Days when you have an average or higher number of these cycles are the best times to make crucial decisions as your mind is calm and centered and you are most likely to receive Angelic guidance in your life. Thus, these are great times to meet someone new.

Wisdom Days: Days with an average or higher number of Wisdom Aspects are the days when most people have better judgment and greater clarity. This is a very positive energy to have in a relationship.

Personal Cycles: Average number of Wisdom Cycles: 3. High number of Wisdom Cycles: 4+.

Universal Stars: Average number of Wisdom Aspects: 3. High number of Wisdom Aspects: 4+.

Blunder Cycles and Days

Blunder Cycles: Higher than average numbers of these cycles incline you toward making mistakes, sometimes BIG mistakes. They can incline you to delude yourself and even make it more likely to be deceived by others. Beware of anyone you meet during high numbers of Blunder Cycles who seems too-good-to-be-true – they are unlikely to be what they seem. The best advice about anyone you meet during multiple blunder cycles is this: stick to tried and true wisdom – don't do anything unusual or untested; stick to the safest course – don't take risks or go out on a limb; stick to common sense – if something is generally considered to be a bad idea, don't do it.

If your Blunder Cycle(s) are Light Rust (transits outside the power orb), your risk of making an error or errors is higher than normal. If your Blunder Cycle(s) are Dark Rust your risk is very high. [More](#)

Blunder Days: Days with multiple Blunder Aspects are days when most people are at greater than normal risk of errors in judgment. The color of the cycle indicates lower or higher risk just like in Blunder Cycles.

Personal Cycles: Average number of Blunder Cycles: 3. High number of Blunder Cycles: 5+.

Universal Stars: Average number of Blunder Aspects: 4. High number of Blunder Aspects: 5+.

Nuclear Cycles and Days

Nuclear Cycles: Relationships begun under multiple Nuclear cycles are seldom a "fit" for you and you are likely to later find yourself with serious and irreconcilable differences with the person you met during these times. Nuclear cycles are also representative of severe bad judgment and planning and are included in Blunder cycles.

The Light Maroon portion (transits outside the power orb) of Nuclear cycles indicates times when important first meetings are inadvisable. The Dark Maroon portion (the power orb of a transit) indicates times when you are particularly at risk of fallout! [More](#)

Nuclear Days: Day with a higher than average number of Nuclear Aspects are days when everyone is at greater risk of a relationship mismatch or later serious differences. The color of the cycle indicates lower or higher risk just like in Nuclear Cycles.

Personal Cycles: Average number of Nuclear Cycles: 0 or 1. High number of Nuclear Cycles: 2+.
Universal Stars: Average number of Nuclear Aspects: 1 or 2. High number of Nuclear Aspects: 3+.

Blackout Cycles and Days

Blackout Cycles aka Heartbreak Cycles: Multiple Blackout Cycles are the worst possible times for meeting new people. Starting a new relationship during Blackout Cycles most often eventually leads to heartbreak – especially if begun during the Black portion of the cycle. During Blackout Cycles, you are very unlikely to meet your soulmate even if you also have Cinderella Cycles. Blackout Cycles are also characterized by bad judgment and people seeing you in your worst possible light.

The Gray portion (transits outside the power orb) of Blackout Cycles indicates times important first meetings are inadvisable. The Black portion (the power orb of a transit) indicates times when you are particularly at risk for heartbreak!

Blackout Days aka Heartbreak Days: Days with a higher than usual number of Blackout Aspects are days when everyone is at greater risk of a Heartbreak Relationship. The color indicates just how much greater the risk just like in Blackout Cycles.

There are lots of ways you can get your heart broken, not just by falling in love and then getting dumped. Lots of things can happen to break your heart, such as messing up your reputation, having an unwanted pregnancy, contracting an STD, loaning money which isn't paid back, etc. If you meet someone with multiple Blackouts in your cycles or in the day itself, heartbreak can somehow happen EVEN IF you believe you are truly in love and you are both good people with good intentions.

Blackout Cycles and Days are insidious; they can make you cling to a relationship despite obvious problems until you are in over your head, then they can break your heart. Blackout Cycles and Days couldn't work the way they do unless they had the power to draw you in first.

Try not to be too frustrated if you have multiple Blackouts in your cycles or in the day itself. Because you know about your Blackout Cycles or Day, you can be extra careful. If there were no Blackout Cycles or Days, finding true love would be easy for everyone.

Blackout Cycles are an inevitable part of everyone's life. It may seem depressing to see multiple Blackouts in your cycles or in the day itself, but think of it this way: knowing when a new meeting would likely lead to heartbreak can save you from wasting months or years on someone that would ultimately be a serious disappointment or worse, and maybe missing your soulmate in the meantime.

If you have Blackout Cycles: Be patient and use your Blackout Cycles to get ready for your Cinderella Cycles. If you're hanging onto an old flame, a wishful relationship, or an unfulfilling relationship, release it now! Do whatever grieving you need to do – even if it really hurts. Release what didn't work so you're ready for something better. Don't miss your soulmate during your next Cinderella Cycles because you're still holding onto something going nowhere.

Remember – you don't have to let go of the dream you had for a bad or wishful relationship, you only have to let go of the reality! KEEP YOUR DREAM for when you meet your true soulmate.

Be patient, this time isn't wasted. Blackout Cycles are the perfect time to work on your ability to be in a healthy, loving relationship: analyze old relationships to understand your part of what went wrong, get some therapy if you need it, read self-help books, work on your attitudes, learn better relationship skills. We all have some room for improvement in these areas. Physically, take this time to get in shape so you'll feel and look your best

Get ready for your next Cinderella Cycles with a [Star-Timer Love Calendar](#).

Knowing when to move forward and when not to is one of the keys to achieving your dreams. Understanding your own timing allows you to become one of the rare few who really can fulfill your dreams. [More](#)

Personal Cycles: Average number of Blackout Cycles: 0 or 1. High number of these Cycles: 2+.
Universal Stars: Average number of Blackout Aspects: 1. High number of these Aspects: 2+

Strategies

If your Ruling Chart Report looks good:

Congratulations! You have a greater than average opportunity with this relationship and are more likely to be safe in moving ahead with it. Even so, you should always keep your eyes and ears open for yellow or red flags and listen to your intuition and what your wise friends say. Continue the relationship's positive energy wave by choosing next-stage dates such as 1st lovemaking and Engagement dates carefully.

If your Ruling Chart Report looks sketchy or mixed:

If you proceed, proceed with caution. Keep your eyes and ears open for yellow or red flags. Listen carefully to your intuition and what your wise friends say. Do your best to improve the relationship's energy and chances by choosing next-stage dates such as 1st lovemaking and Engagement dates carefully.

If your Ruling Chart Report looks negative:

If you proceed, proceed with EXTREME caution. This is a Free Will Universe and you get to decide what you want to do. If you decide to move ahead despite the risks, keep your eyes and ears open for yellow or red flags. Listen carefully to your intuition and what your wise friends say. If you are going to continue the relationship, you may be able to improve the relationship's chances by choosing next-stage dates such as 1st lovemaking and Engagement dates carefully.

Get a next-stage date:

To check out a single date, order another [Love-Stars Ruling Chart Report](#) for your proposed date.

To check out multiple dates, order a [Star-Timer Love Calendar](#) for each of you.

Get a MAGIcal Wedding Date:

Most Heartbreak Clashes between people and with their Ruling Charts can be overcome by a perfect or near-perfect wedding date. A MAGIcal date = "Happy & Successful Ever After" [More](#)

If you are in a Blackout Cycle, WAIT. Don't keep meeting new people. Look ahead to see when your Blackout Cycle(s) will pass and your Cinderella Cycles will start with a [Star-Timer Love Calendar](#).

Don't panic if you have negative cycles! Everyone has them. You've had them many times in the past – you just didn't know they were there. But even when you were in “blissful” ignorance of their presence, negative cycles were active in your life – these were the times you failed at something despite your best efforts, made a bad impression when trying to make a good one, met a heartbreak instead of a soulmate, or made a major blunder when you were trying to be wise.

Negative cycles have several types of effects:

Internally, they can make you intermittently feel more depressed, confused, angry, pessimistic, vulnerable, tired or weepy. But don't think every day will be a bad day during bad cycles. It's perfectly possible to enjoy life most days even during multiple negative cycles! If you have a bad day or even a bad week during negative cycles though, at least you know it's due to the stars and won't blame yourself or something or someone else. In most cases, our emotional state correlates even more strongly to the stars than to the situations in our life!

Outwardly, negative cycles make you less appealing to others and they can destroy the things you begin under their negative influence.

Accept your negative cycles. Sometimes you will have more negative cycles, and sometimes you will have fewer. The key is to avoid major decisions and crucial new beginnings during these times. It makes sense that there are times to move ahead and times to wait if you want to achieve your dreams. Sometimes life requires us to be patient and wait longer than we would like to move forward, but when we haven't exhausted ourselves and our resources getting nowhere during unfavorable times, we can push ahead maximally when the stars change and begin to favor success. Knowledge of your negative cycles makes you one of the VERY FEW people who won't be unknowingly undermined by them.

Find out YOUR days to make all your dreams come true with a [Star-Timer Calendar](#).
